

KEY FEATURES OF RESONO APP

Intuitive Voice Recording

- One-tap start and stop functionality.
- High-quality audio capture using device's microphone.

Recording Management

- Save recordings with custom names.
- View, play, and delete recordings from the app interface.

Background Recording

- Continue recording while using other apps.

Optimized Storage

- Efficient file compression for minimal storage usage.

User-Friendly Interface

- Clean, modern UI built with Jetpack Compose.

RAYAN BADAR

DEVELOPMENT PROCESS

Planning & Design

- Defined core functionalities based on user needs.
- Created UI wireframes for seamless user experience.

App Development

- Framework: Android Studio with Kotlin.
- UI: Jetpack Compose for modern and responsive design.
- Audio API: Used MediaRecorder for voice capture.
- File Handling: Managed storage using Android's file system.

Testing & Optimization

- Debugged app functionality for smooth performance.
- Optimized storage usage and ensured background functionality.

Deployment

- Packaged as an APK.
- Prepared for GitHub upload for version control and sharing.
